- **Languages:** Node.js, PHP, Javascript, Typescript, Python, Java, HTML, CSS, VBA (Visual Basic for Applications)
- **Frameworks/Libraries:** NestJS, React, React Native, Tailwind CSS
- **Cloud Platforms:** AWS (Lambda, EC2, Elastic Load Balancer, API Gateway, CloudWatch, SQS, S3, Certificate Manager, IAM), GCP (Google Function, Pub/Sub), Confluent Cloud (Apache Kafka), CloudFlare
- **Databases:** MySQL, MongoDB

## Professional Experience

---

### INNGAGE - ENGAGEMENT SOLUTIONS

- **Period:** February 2021 - May 2025
- **Position:** Specialist Developer
- **Main Responsibilities:**
  - Developed and maintained software solutions using Node.js, React, and other relevant technologies.
  - Integrated with AWS cloud services to optimize performance and scalability.
  - Collaborated with multidisciplinary teams to deliver high-quality projects.
  - Implemented serverless technology (AWS Lambda and Google Cloud Function) and queue formation using AWS SQS and Google Pub/Sub.
  - Refactored the main project for a multichannel structure, significantly increasing services offered.
  - Implemented streaming technologies (Apache Kafka) and reconfigured data structure (MongoDB) to support expected scalability.

- Proposed, designed, and developed software solutions and continuous improvements for the business.
- Developed and managed cloud architecture, focusing on cost optimization and performance enhancement.
- Provided support and guidance to other developers.
- Managed databases (MySQL and MongoDB).
- Developed new features and REST APIs in PHP and Node.js based on microservices architecture.
- Reviewed and approved pull requests from other developers on Git.
- Proposed new solutions and assessed costs of new tools and technologies.
- Provided support for issues faced by clients.
